## 4TH OF JULY IS RIGHT AROUND THE CORNER!

117 years ago, the City of Huntington Beach hosted its first 4th of July Celebration. The City has since grown into a world-class destination, yet its small town sensibilities and rich history continue to take center stage during our Annual 4th of July Celebration.

This year's Celebration will held on July 2-4, 2021 and has been modified to adhere to statewide COVID-19 guidelines that may be in place at that time. Festivities include Neighborhood Car Parades, an outdoor Pier Plaza Festival, socially distanced and virtual Surf City 5K Runs, and Home/Business Decorating Contests. The events will be capped off with an incredible Fireworks Show over the Pacific Ocean.

"There's no better place to celebrate the 4th of July than Huntington Beach," says Mayor Kim Carr. "Our residents truly embrace the spirit of independence, and we invite the community to come out and take part in the modified Celebration. We have something for everyone and look forward to celebrating with you this year."

**June 1-30 – Annual Home and Business Decorating Contest** – Our 4th of July festivities are well underway, as local residents and businesses begin decorating for the Annual Home and Business Decorating Contest. ## CITY RECEIVES \$6.6 MILLION GRANT AWARD FROM FEMA FOR THE HEIL AVENUE STORM WATER PROJECT

We're excited to share some more good news regarding infrastructure in HB! We learned recently that FEMA has awarded the City with a \$6.6 million grant to fund our Heil Ave. stormwater project. The improvements are going to dramatically improve our ability to drain and discharge stormwater to mitigate flooding risks, with major components set to include:

- Constructing a new stormwater pump station and outlet discharge facilities near the intersection of Heil Avenue and Gothard Street to adequately drain and discharge stormwater from the adjacent residential areas during heavy storm events.
- The new stormwater pump station and outlet discharge facilities will be installed on the east side of the Murdy Flood Control Channel, immediately across the channel from the existing pump station.
- The proposed pump station will have four pumps: two existing pumps, which will be relocated from the existing pump station to the new pump station, and two additional pumps. A new outlet system that discharges to the flood control channel will also be constructed.

## CONSTRUCTION UPDATE

### Saybrook Sewer Lift Station

The new manhole excavation is complete and the manhole rings have been installed. The contractor is in the process of backfilling the excavation after successful leak testing of the manhole. The next step will involve installing the sewer bypass system to allow for uninterrupted sewer service during

installation of the lift station. This project is scheduled to be completed Winter 2021.

### Slater Roof Replacement

The roof replacement project has initiated has commenced at the Slater Storm Drain Pump Station.

Temporary scaffold has been installed, roof demolition has initiated, four old mufflers have been removed, and framing for the new muffler installation are in prog-

ress. This project is scheduled to be completed in July 2021.

### Fiber Optic Installations

The contractor is completed the boring operation for the fiber conduit installation. The next phase of the project will be to pull the fiber optic cable through newly installed conduit. The project is anticipated to be completed this summer.

## CONSTRUCTION UPDATE

### Arterial Rehabilitation Project at Newland, Brookhurst, Garfield, and Atlanta

The contractor completed Brookhurst and Newland striping and installed traffic loops. The next segment to be repaved will be Atlanta Ave from Beach to Delaware, followed by Garfield from Main to Delaware. This project will be under construction through the Summer 2021.

### Slater Sewer Lift Station

Construction has continued progressing building the structure in the wet well. Reinforcement bar has been placed and the concrete he walls will soon be poured. The building of the structure will continue for several weeks.

In addition, the contractor is excavating for the new sewer lines that will lead to the new sewer lift station.

## CONSTRUCTION UPDATE

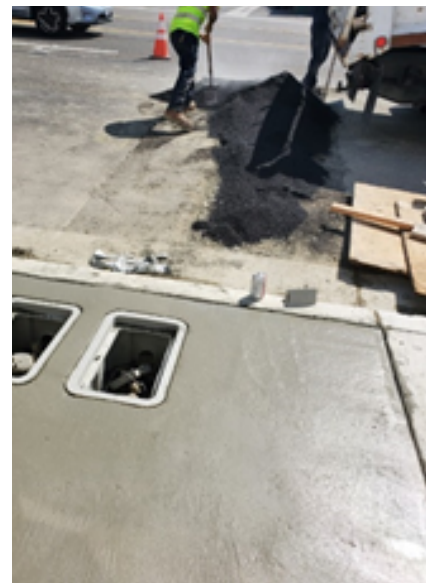

### Residential Overlay - Zone 3

The contractor began project preparatory work for the overlay project of the residential streets in Zone 3. They have initiated the project with crack sealing of existing cracks on the streets.

This project will overlay over one hundred residential streets and anticipated to complete this summer.

### Water Line Reliability Improvements on PCH

The Utilities Division completed transferring 20 service lines from an existing 3-inch water line to nearby a 14-inch water line on Pacific Coast Highway (PCH) in Sunset Beach, from Park Avenue to 16th Street. The 3-inch water line is located underneath the sidewalk along the north side of PCH and was installed in 1958. The line has become increasingly difficult to repair due to limited parts availability and its closeness to homes, businesses, and other utilities.

Reconnecting the service lines to the nearby 14-inch water line will make it easier to repair in the future and improves long-term reliability for the businesses and residents.

Join the Huntington Beach Art Center on Saturday, June 12 from 1-3 p.m. for a special closing celebration in honor of the 2021 Judith Hendler Design Competition. World-renowned jewelry designer Judith Hendler invited Southern California Community College fashion students and Huntington Beach Art Center members to create the unisex "Cocoon Cloak."

Answering the base needs of self-expression and protection from the elements on the human form, the design is inspired by traditional multifunctional garments like the Caftan, Tunic, and Poncho. Two dozen artists have masterfully imagined garments based on sustainable design principles: re-use, recycle, and up-cycle. With an overwhelming response from the community, we are celebrating these talented designers one last time before the close of the show.

In addition to testing and installing smoke alarms, the campaign is designed to educate the community on how to keep your home fire safe.

Below is a list of the safety checklist items:

- Test smoke alarms and install smoke alarms in areas required by code
- Create a Home Fire Escape Plan
- Review Fire Safety Checklist
- Review Earthquake Preparedness Checklist

The American Red Cross partnership is a strong and effective program to make our community safer, and we look forward to similar events in the future.
